

Find your version

To find the version of software that you have on your machine follow these steps.

For example, in Excel:

- Choose File
- Choose Account
- Click on the 'About Excel' button on the right

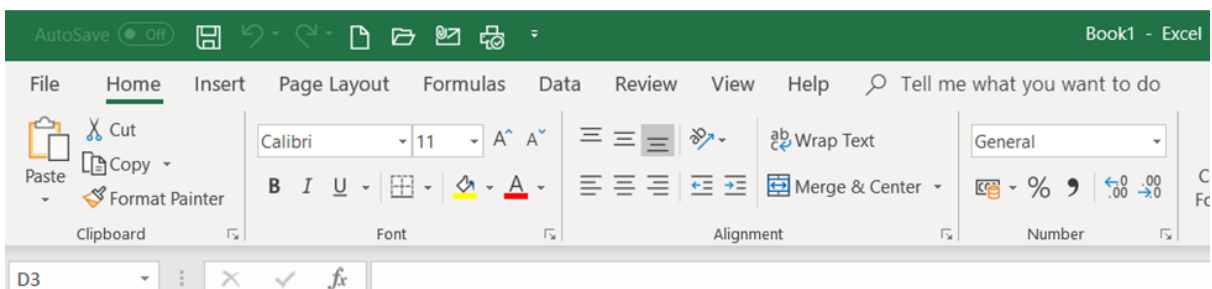

- Then you will see the version displayed at the top of the Page

About Microsoft® Excel® 2016

Microsoft® Excel® 2016 MSO (16.0.9126.2315) 32-bit
Product ID: 00202 50820 78710 AA000

If the version says Office 365 a green ribbon denotes Excel 2016 and a white ribbon is Excel 2013.

Please note that as MS Project is a standalone product and not part of MS Office you may have a different version of MS Project to the version of your other MS Office software on your machine. Check using the same steps.

I hope this is helpful.
